Through the sustained and committed support from the Kin San Tai Chi Academy, Foundation Care For All – The Netherlands, in cooperation with its partner-organisations Care For All – Nepal and the Karnali Depressed Empowerment Centre (KDEC), has been able, for the past 2.5 years, to conduct two awareness programs in Primary and Secondary Schools across Kaski, Parbhat and Mugu districts of Nepal. These programs are organised with the aim of creating and enhancing awareness among Nepal students about such crucial topics as the environment, hygiene and sanitation.

The programs are interactive in nature, propelling students to discuss and engage creatively with the above topics under the guidance of local FCFA staff, who preside over the programs. At the end of each program, the students are given a set of products, including a toothbrush, shampoo, and soap as well as information-booklets

Evaluations of these programs, as well as the feedback of the students, have shown that, even though it is “only” a one-day intervention, this workshop has a considerable effect on the knowledge and behaviour of the trained students.

The overall expenditure of a one-day, interactive awareness program is approximately 70 euro, an amount that includes the remuneration of the trainers, transportation costs, and the leaflets and “tool-kit” handed out to all the students.

We would like to make use of this opportunity, and on behalf of our partner-organisations and the target schools, to extend our gratitude to the the Kin San Tai Chi Academy for their support, and we hope and look forward to our future cooperation.
